

ADVANCED EMBEDDED LINUX DEVELOPMENT

CODE: ADV/ELD-2M

1. EMBEDDED C PROGRAMMING

- a. INTRODUCTION TO EMBEDDED C PROGRAMMING
- b. BUILD PROCESS (COMPILING ,LINKING AND LOCATING)
- c. DATA TYPES, VARIABLES, LOOPS AND NESTED LOOPS
- d. POINTER AND ADVANCE POINTERS
- e. WORKING ON BIT MANIPULATION
- f. DATA STRUCTURE IN C
 - i. LINKED LIST
 - ii. TREE (BST)
- g. CODE OPTIMIZATION

2. EMBEDDED LINUX SYSTEM DEVELOPMENT

- a. COMMANDS IN LINUX
- b. LINUX SHELL SCRIPTING
- c. SYSTEM CALLS (POSIX)
- d. GNU TOOL CHAIN
- e. GCC COMPILER
- f. GDB DEBUGGER
- g. MAKE UTILITY
- h. BASIC LINUX PROGRAMMING
- i. LINUX PROCESS MANAGEMENT
 - i. TASK STRUCTURE AND PROCESS TABLE
 - ii. CREATION, TERMINATION AND DAEMON PROCESS
- j. LINUX SCHEDULER
 - i. FIFO
 - ii. ROUND ROBIN
 - iii. PRE-EMPTIVE

- k. INTRODUCTION TO LINUX FILE SYSTEM
- l. HANDLING FILES AND DIRECTORIES

3. ADVANCE EMBEDDED LINUX SYSTEM DEVELOPMENT

- a. PLAYING WITH THE LINUX ENVIRONMENT
- b. TERMINALS AND PSEUDO TERMINALS
- c. LINUX DEVELOPMENT TOOLS CHAIN
 - i. COMPILERS
 - ii. PROFILERS
 - iii. DEBUGGERS AND THEIR USAGE
- d. DATA AND MEMORY MANAGEMENT
- e. PROCESSES CREATION AND THEIR CONTROL
- f. SIGNAL HANDLING
- g. POSIX THREAD PROGRAMMING.
 - i. MULTI THREADING ITS ADVANTAGES & DISADVANTAGES
 - ii. THREAD SYNCHRONIZATION
 - 1. SEMAPHORE
 - 2. MUTEX
- h. DIFFERENT TYPE OF INTER PROCESS COMMUNICATION MECHANISM
 - i. SEMAPHORE
 - ii. PIPES
 - iii. SHARED MEMORY
 - iv. MESSAGE QUEUE
- i. NETWORK PROGRAMMING USING SOCKETS

4. INTRODUCTION TO SOFTWARE DEVELOPMENT

- a. LIFE CYCLE OF SOFTWARE DEVELOPMENT
- b. COMPONENTS OF A DEVELOPMENT SYSTEM

5. EMBEDDED LINUX SYSTEM DEVELOPMENT

- a. WHAT ARE EMBEDDED SYSTEMS?
- b. INTRODUCTION TO CROSS PLATFORM DEVELOPMENT PROCESS
- c. LINUX AS AN EMBEDDED OPERATING SYSTEM

- d. EMBEDDED SYSTEM DEVELOPMENT HARDWARE AND EMULATORS

6. HARDWARE BASICS FOR EMBEDDED SYSTEM

- a. INTRODUCTION TO DEVELOPMENT BOARDS AND HARDWARE
- b. INTRODUCTION TO PROCESSORS, PERIPHERAL COMPONENTS , BUSES AND MEMORY
- c. INTRODUCTION TO ARM PROCESSOR, ARM ARCHITECTURE AND ARM PROGRAMMER'S MODEL.
- d. UNDERSTANDING THE INTERGRATORCP AND VERSATILEPB DEVELOPMENT BOARD BOARDS
- e. COMPONENTS OF A DEVELOPMENT BOARD.

7. DEVELOPING COMPLETE EMBEDDED SYSTEM FROM SCRATCH

- a. EMBEDDED LINUX
- b. CONFIGURATION OF THE CROSS DEVELOPMENT ENVIRONMENT
- c. EMBEDDED SOFTWARE ARCHITECTURE AND COMPONENTS
- d. INTRODUCTION TO CROSS DEVELOPMENT TOOL CHAIN AND UTILITIES.
- e. LINUX BOOT LOADERS & COMPILATION
 - i. UBOOT
 - ii. REDBOOT
- f. LINUX KERNEL DIRECTORY HIERARCHY
- g. LINUX KERNEL DEVELOPMENT ACTIVITY
 - i. KERNEL SELECTION
 - ii. KERNEL CUSTOMIZATION
 - iii. KERNEL COMPILATION (MAKING ZIMAGE FOR BOARD)
 - iv. KERNEL PORTING
- h. INTRODUCTION TO EMBEDDED FILE SYSTEM (MAKING ROOT FILE SYSTEM)
 - i. PREPARING BUSYBOXS AND CROSS COMPILING
 - j. BOARD BRING UP ACTIVITY (USING UBOOT, ZIMAGE, ROOTFS)

LAB WORK:

- A. BOOT LOADER CROSS COMPILATION
- B. BUSYBOX CROSS COMPILATION

- C. BOARD BRING UP ACTIVITY FOR MINI2440
- D. BOARD BRING UP ACTIVITY FOR VERSATILEPB

S-CUBE™
